# SME – April 2009 Factory Tour

Society of Manufacturing Engineers  
Chapter 051 – North Texas Chapter

## Forging Processes

Trinity Forge - Mansfield, Texas  
ISO 9001:2000 & AS9100:2004

This month the North Texas Society of Manufacturing Engineers will be touring Trinity Forge. This is a rare opportunity to see one of the oldest but most efficient methods to shape metal parts with excellent grain direction and high strength. If you have never seen a forging operation, then you definitely need to attend this free tour. We are having the tour in the morning, so you will have a chance to make it before going to work!

From agriculture to oil. From railroads to pharmaceuticals. The dedicated craftsmen and business-support specialists at Trinity Forge maintain a standard of excellence that makes them a top-rated supplier wherever they do business. If your company utilizes forged parts, you can trust us for unmatched flexibility, versatility, quality and, most of all, a passionate commitment to service.

Since 1955, Trinity Forge has stood the test of time. Using a forward-thinking approach to an ancient process, they have earned the trust and respect of the world's best-known OEMs one company and one project at a time. Today they are more than ready to earn yours. No matter the complexity of your specifications or the volume of your run, chances are they have already done something like it. After all, they have been shaping the parts that shape industry for over half a century.

**Must be over 18 years old. Must wear flat sole shoes. Please bring safety glasses.**

**Date:** Thursday April 30, 2009
