
SME – October 2008 Dinner Meeting

Society of Manufacturing Engineers
Chapter 051 – North Texas Chapter

Underwriter Laboratories

With the flood of cheap low-quality imports and labor, manufacturing engineers should stay informed about the product safety standards & regulations that we expect in USA. This month Underwriter Laboratories will make a presentation that answers the fundamental questions of Who is UL? What can it do for me? How do I contact them? With over a century of product compliance expertise, the UL Mark is one of the most widely recognized and trusted safety symbols in the world and communicates to your customers that you have gone the extra step to ensure the safety and quality of your products. This presentation will be delivered over dinner at Humperdink's in Arlington, which is centrally located in the Metroplex. Emmit Jack and Curtis Thornburg will be presenting. Emmit is in engineering services and Curtis is a highly experienced engineer in TELECOM and supporting industries. Please do not miss this important and informative presentation. Bring a friend or spouse!
