Time: 2:00 pm

Plant Tour of Newcomb Spring – Dallas, Texas

Summer is over and it is time for your SME chapter to “spring” into action again. This month we will be touring Newcomb Spring in northwest Dallas. Spring winding fascinating operation because of the high speeds involved and also for the incredibly intricate machinery. For over a century, the Newcomb Spring Corporation has proud to have earned a reputation as one of the premier companies in the spring and wire form manufacturing industry. Each of their nine facilities is ISO-certified and equipped with state-of-the-art machining equipment to produce compression springs, extension springs, torsion springs, flat forms & strip forms, wire forms, and battery contact springs. If you would like to have specific information about their capabilities, please contact Cricket Rumsey at crumsey@newcombspring.com

Please RSVP for Tour by Friday September 19:

Paul Oehler - SME Chapter 051 Chairman at factorybuilder@yahoo.com or call 817-656-0048
