PLANT TOUR OF TRUEX, INC.

Location:

Truex, Inc.
300 Armistice Blvd.
Pawucket, RI 02861

Date:

Tuesday,
October 23,
2007

Schedule:

5:00 p.m. – Plant Tour
6:30 p.m. – Dinner

Join the New England District of the Precision Metalforming Association for an interesting and informative tour of Truex Incorporated located in Pawtucket, RI.

Established in 1976, Truex has customers from Canada to South America serving the appliance, lawn and garden, plumbing, hydraulic, electrical, marine, automotive, pneumatic and furniture industries. Truex is a manufacturer of deep-drawn and stamped parts fabricated from brass, copper, steel, stainless steel and aluminum.

The plant tour will bring you through various departments that have implemented lean manufacturing, utilizing tools such as 5-S, value-stream process mapping and visual controls. This program started in May 2005 and has demonstrated impressive results. Less waste, increased efficiencies, lower operating costs, reduced overtime, reduced quality scrap, improved on-time delivery and a much safer, cleaner and brighter shop are noticeable results of this program. Take advantage of this tour to see how the 5-S program can improve your place of employment.

Register today, as space is limited. For more information on Truex, please visit www.truexinc.com.

Truex, Inc. reserves the right to review the list of tour registrants and deny any individual or company access to the manufacturing areas due to a competitive situation.

Next Meeting: Process Improvements - 11/27/07

Register today! The form is located on the reverse side of this page.

Plant Tour of Truex, Inc.
