AMT's Open House will feature emerging automation application demonstrations using products from leading manufacturers including ABB, Cognex, FANUC, Kawasaki, KUKA Robotics, Motoman, Perceptron, Shafi, Siemens & Welding Solutions Inc. Attendees will be able to view first hand multiple robotic applications including bin picking, flexible racking, assembly, pick & place, flexible gauging, palletizing, part tending & spot welding applications with a focus on emerging automation solutions. Attendees will leave with a clear understanding of how today's latest manufacturing automation technologies can help cut costs, increase flexibility and reduce delivery times. Check out AMT's new **YouTube Channel** featuring videos from last year's event at:
