HALES MACHINE TOOL, INC.

STARTED IN 1983

Hales Machine Tool Inc. has two offices: Minneapolis and Cascade, Iowa. In Minneapolis, Hales Machine Tool has a 13,100 square foot show room and 25 employees, 14 dedicated to parts, service and engineering.

**LEADING DISTRIBUTOR
OF HIGHEST QUALITY
MACHINE TOOLS**

**Ask about our inventory of
reconditioned and used
CNC machining and turning
centers.**

sign so machines and pallets can be added as your needs grow. The also produce a very nice line of vertical machining centers, boring mills, bridge mills and grinders.

WALTER
CNC tool & cutter grinders, CNC carbide saw blade grinders, CNC tool & cutter inspection machines, all automation capable and "cyber" off line programming/simulation software.

WASINO
Produces one of the worlds finest turning centers with gantry loading. There are various configurations including plain 2 axis lathes up to machines with 2 turrets, twin spindles and live tooling with Y axis motion.

WILLEMIN
High precision 3, 4 & 5 axis machining centers with bar feed options, up to 20 spindle multi spindle machining centers with 3 & 4 axis capability.

**\$\$ Financing Available

**Turn Key Services Also
Available**

AMADA

Standard, automatic and CNC cutoff band saws. Sizes range from 10" to 80" diameter capacity.

BROTHER

The world's fastest and most reliable mill/drill/tap machining center.

COSEN

Competitively priced band saws in almost every conceivable configuration.

DOOSAN INFRACORE

High quality CNC lathes, heavy duty, rigidity for close tolerance jobs requiring "tenths" in production and 16 micro-finish without special tooling. Heavy duty CNC machining centers: vertical and horizontal models.

ESAB CUTTING SYSTEMS

Many different types of plasma cutting machines, laser cutting machines, both abrasive and non-abrasive water jet cutting machines.

EUROTECH

High tech turning, sub spindle, twin spindle, single & dual turrets, live tools, 3 to 7 axis.

EUROTURN

Multi-Spindle Automatics in various sizes and configurations for high volume part production with excellent accuracy and speed.

MILLTRONICS

Built in Minnesota, with a wide variety of Manual, Manual/CNC and CNC Vertical Knee Mills, Vertical and Horizontal Machining Centers and Lathes. Very easy Conversational Programming with Teach Functions to "learn" the operator's movements as well as "G & M" code. Available with many different controls. Custom machines built based on your application.

NOMURA

Sliding headstock CNC controlled "Swiss Type" lathes. Size capacity range from 5/8 to 1" bar stock. Available with live tooling, C-axis & sub spindles.

TOYODA

High precision, high speed horizontal machining centers with 450 mm to 1250 mm pallets. Can be purchased as a stand alone machine or with a rail-guided vehicle with multiple pallets and machines. They have a modular de-
